PROFESSIONAL SUMMARY

Licensed Electronics Engineer and Electronics Technician with experience in embedded systems, computer vision, machine learning deployment, and technical troubleshooting. Skilled in Python, C++, and AI model optimization, with hands-on experience developing edge AI solutions and integrating hardware and software systems. Seeking opportunities in software engineering, AI/ML, cloud computing, or embedded systems development.

EDUCATION

BICOL UNIVERSITY POLANGUI Bachelor of Science in Electronics Engineering, CUM LAUDE	Polangui, Albay 2021-2025
--	------------------------------

EXPERIENCE

SERCOMM PHILIPPINES INC. Product Engineering Intern - Sorted and tested over 200+ defective PCBs from the production line (No boot, IO errors etc.) - Identified and resolved system errors through root-cause analysis, debugging, and functional validation testing - Interpreted test logs to diagnose firmware/software faults and support corrective action implementation - Documented technical findings, issue resolutions, and test results through detailed engineering reports - Collaborated with engineering teams to improve troubleshooting workflows and maintain product quality standards	Calamba, Laguna June 2024 – July 2024
--	--

PROJECTS

CAPSTONE: Prediction of Hatching Time of Chicken Eggs using Machine Learning (NCNN)

- Designed and deployed an AI-powered egg candling system using a custom-trained YOLOv11 model, achieving 74.89% prediction accuracy through real-time computer vision analysis.
- Developed an embedded Raspberry Pi 4 solution for image capture, edge inference, and an LCD-based prediction display
- 2025 Bicol University Polangui Student R&D Forum: 1st Place - Agriculture, Aquatic, and Natural Resources (AANR) – Development Category

Personal Portfolio Website – HTML, CSS, GitHub

- Designed and implemented a responsive personal portfolio website using HTML and CSS, and successfully deployed it via Vercel.
- Link: <https://jtnatividad-portfolio.vercel.app/>

CERTIFICATIONS

AWS SKILL BUILDER: CLOUD ESSENTIALS	May 2026
LICENSED ELECTRONICS ENGINEER Valid until April 28, 2029	April 2026
LICENSED ELECTRONICS TECHNICIAN Valid until April 28, 2029	April 2026

TECHNICAL SKILLS

Programming & Software: Python, C++, HTML, CSS, Git/GitHub
AI & Machine Learning: Computer Vision, AI Training, Custom Database, YOLOv11, NCNN
Embedded Systems: Arduino, Raspberry Pi 4, Hardware-Software Integration
Cloud & Networking: AWS Cloud Fundamentals (Basic knowledge of Cloud Concepts), Network Fundamentals
Engineering Tools: AutoCAD, Fusion360
Electronics and Hardware: Circuits Design, Circuit Analysis, PCB Design
Office Suites: Microsoft Office, Google Workspace
Soft Skills: Analytical Problem Solving, Root Cause Analysis, Technical Documentation, Communication Skills, Adaptability, Time Management.
